

Tenable Named Finalist in 2009 SC Awards Program

Nessus recognized for the 3rd year in a row by SC Awards Program

January 14, 2009 – Columbia, MD – Tenable Network Security, the leader in unified security monitoring and creator of the popular and award-winning Nessus® vulnerability scanner, has been named a finalist in the 2009 SC Awards program for outstanding achievement in information technology (IT) security.

Tenable's Nessus Vulnerability Scanner was named a finalist in the Excellence Award Best SME Security Solution category, which recognizes companies with superior security products that help customer tackle today's pressing security challenges.

IT security companies nominate their solutions for consideration in the SC Awards program, and entries are judged by a panel of 18 leading chief security officers from major corporations and large public sector organizations.

"Security remains a top agenda item that enterprises need to address. Tenable Network Security is at the forefront of IT security and is among a select group that has been recognized as a finalist in our Excellence Awards competition," said SC Magazine Editor-in-Chief Illena Armstrong.

The annual SC Awards have recognized security's key contributors and outstanding products for more than a decade. As the industry's preeminent awards program, individuals, brands and products shortlisted address not only the challenges prominent today, but also the emerging threat landscape of tomorrow.

"We are pleased that Nessus has been nominated for the third year in a row for an SC Magazine Excellence award. We're proud that our innovative development efforts are continuing to see recognition from the security industry," said Ron Gula, CEO of Tenable. "To be nominated for the third year in a row further also underscores how integral Nessus has become as an essential audit tool for both security and compliance within many organizations."

Winners of this year's SC Awards will be announced at a gala dinner and award ceremony to be held in San Francisco on April 21, 2009.

About SC Magazine

SC Magazine provides IT security professionals with in-depth and unbiased information through timely news, comprehensive analysis, cutting-edge features, contributions from thought-leaders and the best, most extensive collection of product reviews in the business. By offering a consolidated view of IT security through independent product tests and well-researched editorial content that provides the contextual backdrop for how these IT security tools will address larger demands put on businesses today, SC Magazine enables IT security pros to make the right security decisions for their companies. Besides the monthly print magazine and daily website, the brand's portfolio includes the SC Awards, SC Directory, SC Magazine Newswire and the SC World Congress.
