

Tenable CEO to Address Techno Forensics Conference on "Keeping up with the Jones' Forensics"

WHAT: Ron Gula will discuss industry trends about how rapid changes in IT technology such as virtualization, storage, data monitoring, social networks and trusted agents will be leveraged to perform forensics in the coming decade. Gula will also address how new regulations are changing the ways industry professionals manage security and forensic investigations. Finally, he will relate the Tenable product offerings to each of these topics.

Gula is one of the leading experts in the fields of network and data security. He began his career while working at the National Security Agency conducting penetration tests of government networks and performing advanced vulnerability research. Prior to founding Tenable, Gula authored the original Dragon Intrusion Detection System.

WHO: Ron Gula, CEO, Tenable Network Security

WHEN: October 31, 2007
1-2 PM

WHERE: 2007 Techno Forensics Conference
NIST
Gaithersburg, MD
