

Tenable CEO to Address Institute for Applied Network Security

WHAT: Tenable Network Security Founder and CEO Ron Gula will discuss how to better manage risk, with a focus on how detection and management technology continues to shape network security. Gula will also address how new regulations are changing the ways industry professionals manage security. Finally, he will relate the Tenable product offerings to each of these topics.

Additionally, Mr. Gula will join Marcus Ranum and Greg Shipley for a panel discussion on the state of information security today.

Gula is one of the leading experts in the fields of network and data security. He began his career while working at the National Security Agency conducting penetration tests of government networks and performing advanced vulnerability research. Prior to founding Tenable, Gula authored the original Dragon Intrusion Detection System.
