

Tenable Releases Security Center 3.4

Tenable adds innovative enterprise functionality and reporting capability to its unified security monitoring solution

April 29, 2008 – Columbia, MD – Tenable Network Security, Inc., the leader in unified security monitoring and creator of the popular and award-winning Nessus vulnerability scanner, today announced it has released Security Center 3.4 for general availability. [Tenable's Security Center](#) provides continuous, asset-based security and compliance monitoring. It unifies the process of asset discovery, vulnerability detection, data leakage detection, event management and configuration auditing for small and large enterprises.

Innovative Features

With the release of Tenable's Security Center 3.4, Security Center users will gain access to many new innovative features that extend its enterprise usefulness in conducting security and compliance auditing.

- Enhanced user interface
- Support for manual Nessus report uploads
- A more robust scan scheduling interface
- A new reporting chapter and many new report templates (PCI, FDCC, etc.)
- Enhanced user management screens
- Support for Nessus 3.2 specific scanning features
- Support for Red Hat ES 5

"We are pleased to announce the release of the next version of Security Center," said Ron Gula, Chief Executive Officer of Tenable. "Security Center 3.4 combines the functionality required by the changing network landscape with reporting options that make its use efficient and effective for measuring, monitoring and meeting compliance requirements."

Test-Drive Tenable's Security Center 3.4

Tenable Network Security provides a suite of solutions which unify real-time vulnerability, event and compliance monitoring into a single, role-based, interface for administrators, auditors and risk managers to evaluate, communicate and report needed information for effective decision making and systems management. If you are a Nessus user and are looking for robust management capabilities, Tenable invites you to evaluate our offerings.
